Experience

Software (Research and Development) Engineer

July 2025 – Present

Creospan Pvt. Ltd., Pune

- Delivered frontend, backend, and DevOps ownership for a high-traffic production platform
- Modernized React.js and Next.js modules and optimized API flows, reducing production defects
- Migrated cronjobs to Jenkins pipelines to improve automation visibility and failure recovery
- Managed deployments on AWS EC2 and S3 and configured CloudFront and IAM for secure releases
- **Tech:** React.js, Next.js, TypeScript, Node.js, REST APIs, Jenkins, AWS, Git, Kubernetes

Software Engineer

August 2023 – July 2025

Privafy Technologies Pvt. Ltd., Bengaluru

- Led development of React.js dashboards with scalable state management and reusable components
- Developed and optimized GoLang and PostgreSQL APIs resulting in 25 percent lower latency
- Automated infrastructure provisioning using Terraform and integrated Vault for secrets management
- Deployed and monitored Dockerized services on Kubernetes improving deployment speed by 40 percent
- Integrated Swagger and MQTT for device to cloud communication in MicroEdge
- **Tech:** React.js, Redux, TypeScript, GoLang, PostgreSQL, Docker, Kubernetes, Terraform, Vault, Jenkins, MQTT, Swagger

Software Engineer Intern

March 2022 – July 2023

Privafy Technologies Pvt. Ltd., Bengaluru

- Built the MicroEdge frontend using React.js and Redux improving UI performance by 20 percent
- Contributed to GoLang and PostgreSQL APIs and assisted in backend feature development
- **Tech:** React.js, Redux, GoLang, PostgreSQL, Swagger, MQTT

Technical Skills

Core Strengths: Full Stack Development, Cloud Deployments, CI/CD, Infrastructure Automation

Frontend: React.js, Next.js, Redux, TypeScript, JavaScript, Material-UI

Backend: GoLang, Node.js, PostgreSQL, MongoDB, REST APIs, MQTT, Swagger

DevOps & CI/CD: Docker, Kubernetes, Jenkins, GitHub Actions, Terraform, Vault

Cloud: AWS EC2, S3, CloudFront, IAM, GCP GKE

Tools: Git, Linux, Jira, Agile and Scrum

Projects

CRMCalling – Role-Based CRM System

- Built a CRM platform supporting lead assignment, call logging, and agent performance analytics
- Implemented role-based access control and optimized API workflows for faster lead updates
- **Tech Stack:** React.js, Next.js, Node.js, MongoDB, AWS

Education

Bachelor in Computer Science and Engineering (Hons.)

August 2019 – July 2023

Lovely Professional University

CGPA: 8.01/10

Achievements

- Google Code Jam Qualification Round 2021
- Kickstart 2021 Round F
- GirlScript Summer of Code 2021 Overall Rank 304
